

I think that the FCC should NOT implement any proposal that would lessen Indiana's Telephone Privacy law protections. My time at home is so much nicer because I do not get so many telemarketers calling. I used to get a lot of these calls and I would get very angry that I was having to listen to these people. Now I rarely get any of these calls. Because I work away from home, I value my privacy and do not want to be bothered by unsolicited calls. Please do NOT change this law!!
